

**MOVE
TO GREEN**

The future of mobility is electric

E-SCOOTER

A handful of reasons why you should drive the zero-emissions way with an electric scooter:

- ✓ *Reduce your carbon footprint*
- ✓ *Eliminate CO2 emissions*
- ✓ *Reduce air and noise pollution*
- ✓ *Benefit from using renewable energy sources*
- ✓ *Support Global SDG 2030*

Most organizations have developed green policies, yet at times wrestle when it comes to converting green ambitions into tangibles. At KJAER & KJAER A/S we feel it is too important not to try.

Instead of waiting for the market to request the green change, we want to offer a green choice and zero emission mobility in a plug-and-go solution. An affordable choice that can get your office started and replace many inner-city trips with a zero-emission mode of transport.

ZERO EMISSION
